INFORMATION TECHNOLOGY

- Network security has been enhanced by configuring the servers (Group Policy) to force password changes every 90 days and requiring complex passwords. In addition, a user's network accounts are locked for a period of 15 minutes if the user exceeds three invalid attempts to logon to the network. After locking, the account will require IT intervention to be reset, or the user will have to wait 15 minutes before repeating an attempt to logon to the ADC network.
- ADC IT staff is working with Kroll, a DIS vendor that is conducting a phased project for Cyber Security Risk Assessment on the State Network. Phase One is Investigation and Evaluation which includes:
 - 1. Meeting
 - 2. Distribution of a CRSA Questionnaire
 - 3. Network and Web penetration testing
 - 4. Advanced threat analysis & monitoring Carbon Black Deployment (in progress).

Kroll has requested an onsite assessment interview with ADC's IT department during the month of October as a part of Phase One.

- -Phase Two is Remediation Guidance.
- -Phase Three is Underwriting
- -Phase Four is Response.

Conference calls and meetings that were attended by **EOMIS** staff include:

- Records Supervisors met to discuss detainee records maintained in EOMIS. Items of discussion included what each record contains and how they are documented.
- DHS Beneficiary Relations Manager, Justin Mizell discussed how the EOMIS extract file is sent daily, what information is sent, and where the file is delivered.
- A discussion was held on Victim Information and Notifications and APPRISS on Parole Board events.
- Call with Marquis to review status of current application issues and development projects, also an update with Contexte and ACC (More information will be available on the status during October).
- -A meeting was held to discuss a request received from CSG for additional data to be used to provide recidivism projections.
- In an introductory meeting, we visited with Microsoft's new representatives and discussed ADC's technology needs. A follow-up meeting will focus on our existing licensing contract and licensing offerings.
- SQL reports are being created internally and processed to allow audit staff access to areas such as Grievance, Classification, Records, Intake, and Incident Report View. The code is being written in a way that allows for other areas to be targeted easier in the future. We

plan to ask department supervisors to review and report needed changes that would allow staff members the access they need to complete their jobs and restrict those not requiring access. This side project spawned from the Security Profile Review discussed at Management Team.
