# TEN YEAR POPULATION PROJECTIONS FOR THE ARKANSAS PAROLE AND PROBATION POPULATIONS BRIEFING BOOK 

By<br>Wendy Naro-Ware<br>Roger Ocker

June 2010

## SUMMARY OF SIGNIFICANT FINDINGS

## OCTOBER 2009 PAROLE \& PROBATION FORECAST - ACCURACY

- Projections for the October 2009 forecast were tracked from July 2009 to May 2010 ( 11 months). The active probation population was forecasted to an accuracy of +0.8 percent while inactive was forecasted to an accuracy of +7.8 percent. Active parole was forecasted to an accuracy of -2.9 percent and inactive parole to an accuracy of +1.7 percent.
- The active probation population was projected to grow an average of 0.06 percent per month between July 2009 and May of 2010. The actual population decreased an average of 0.12 percent per month. The inactive probation population was projected to grow by an average of 0.02 percent per month but actually decreased by an average of 1.28 percent.
- The active parole population was projected to grow an average of 0.32 percent per month between July 2009 and May 2010. The actual population increased an average of 0.67 percent per month. The inactive probation population was projected to grow by an average of 0.77 percent per month but actually increased by an average of 0.03 percent.

## PROBATION TRENDS

- Probationer intakes decreased by 7.2 percent between 2007 and 2008. This trend continued in 2009 as admissions to probation supervision decreased a further 5.0 percent. Since 2004, probation admissions have increased by an average of 0.04 percent per year.
- Probationers in 2009 were sentenced to an average term of supervision of 45.5 months, up from 45.2 months in 2008.
- The number of active probationers (at year end) decreased by 2.5 percent between 2008 and 2009. This is the second consecutive year the active population has decreased in contrast to the 2.4 percent increase between 2006 and 2007. A majority of this recent decrease was among probationers under medium supervision. Drug court cases increased by 6.1 percent.
- The correction in the inactive probation population record system led to a 21.8 percent decrease in the reported unsupervised population.
- In 2009, for probationers ending supervision, the average length of stay (LOS) under community supervision was 33.1 months. This is on par with the 2008 average of 33.0 months and 32.6 months in 2007.
- Probation discharges averaged a LOS of 40.4 months while technical revocations and new felony revocations averaged a LOS of 18.5 and 20.7 months respectively.
- Revocations (new charge and technical together) to the ADC accounted for 12.2 percent ( 1,067 persons) of probation releases in 2009. This is down from 12.9 percent ( 1,157 persons) of probation releases in 2008.

## PAROLE TRENDS

- Parole intakes increased by 6.7 percent in 2008. This is up from a 6.3 percent increase between 2007 and 2008. The increase in intakes was fueled by a 4.6 percent increase in ADC releases, an 8.6 percent increase in DCC transfers and a 31.8 percent increase in intakes from ISC.
- Parolees in 2008 were sentenced to an average term of supervision of 56.6 months, up slightly from 54.7 months in 2008 and 54.2 months in 2007.
- Active parolees increased significantly in 2009, up 9.8 percent. This is in contrast to 2008 when the number of active parolees (at year end) decreased slightly by 0.2 percent.
- Parole technical revocations to the ADC accounted for 10.2 percent of parole releases in 2009 (or 836 cases)
- 8.2 percent (683) of parole releases in 2008.
- 5.3 percent ( 411 cases) of parole releases in 2007.
- This number was 276 in 2006.
- Releases from parole supervision decreased by 2.5 percent between 2008 and 2009. Technical revocations increased by 13.8 percent. Discharges decreased by 14.8 percent.
- In 2009, the average parolee had served 21.7 months upon release, down 6.9 percent from an average of 23.3 months for 2008.
- Technical parole violators were supervised an average of 14.1 months before being revoked while new felony violators had served 16.9 months.

## PROJECTIONS

- At the end of December 2009, the active probation population was 20,654. The population is projected to be 20,391 at year end 2010. By December 2021, the number of persons under active parole supervision is projected to
be 21,037 . The projected change represents average annual increases of 0.3 percent per year through the year 2021.
- At the end of December 2009, the inactive probation population was 11,045. The population is projected to be 10,370 at year end 2010. By December 2021, the number of persons under inactive parole supervision is projected to be 10,705 . The projected growth represents average annual increases of $0.3 \%$ per year through the year 2021.
- Note: probation projections now include drug court cases.
- At the end of December 2009, the active parole population was 13,679 . The population is projected to increase to 14,008 in year end 2010. By December 2021, the number of persons under active parole supervision is projected to be 18,690. The projected change represents average annual increases of 2.7 percent per year through the year 2021.
- At the end of December 2009, the inactive parole population was 7,766 . The population is projected to increase to 7,880 in 2010. By December 2021, the number of persons under inactive parole supervision is projected to be 10,719 . The projected growth represents average annual increases of 2.8 percent per year through the year 2021.
