

Recidivism of Arkansas Offenders

FINDINGS FROM THE 2016 RELEASE COHORT
April 2021

SECRETARY SOLOMON GRAVES

DIVISION OF
CORRECTION

DIRECTOR DEXTER PAYNE

DIVISION OF
COMMUNITY CORRECTION

DIRECTOR JERRY BRADSHAW

State of Arkansas Department of Corrections

April 29, 2021

To: Arkansas Board of Corrections

From: Solomon Graves, Secretary

I'm pleased to present the Recidivism of Arkansas Inmates Findings from the 2016 Release Cohort. This report outlines recidivism rates in Arkansas. All individuals were released from an Arkansas Division of Correction facility or an Arkansas Division of Community Correction Center from January 1, 2016 to December 31, 2016.

Recidivism can negatively impact offenders, families, the victim, law enforcement and communities. Therefore when discussing recidivism rates, the factors that influence recidivism should be considered. For example, personal, sociological, economic and lifestyle factors. The data provided here is descriptive and only includes those released in 2016. Our goal is to provide a snapshot of recidivism rates from the 2016 release cohorts and the statistics provided here should be useful and informative.

In this report, the DOC has studied recidivism rates related to restrictive housing, drug offenses, sex offenses, program participation, security/terrorist threat groups, age, race, gender, time under supervision, educational attainment and other factors. Given that 92% of the offenders housed in Arkansas facilities will one day be released back into our communities, this report can be used to assist the Department of Corrections (DOC) in its continued efforts to prepare offenders to return to society. For example, the DOC provides various treatment programs, reentry programs, work opportunities, educational opportunities and vocational training while providing for public safety and carrying out the mandates of the courts.

Ultimately, our goal is to help individuals desist from criminal behavior upon release and I hope you will find this report informative.

Respectfully,

Solomon Graves

Solomon Graves, Secretary
Arkansas Department of Corrections

Executive Summary

Per Arkansas §16-1-101(a) recidivism is defined as a “criminal act that results in the re-arrest, reconviction or return to incarceration of a person with or without a new sentence during a three-year period following the person’s release from custody”. This report summarizes recidivism rates from the Arkansas Department of Corrections (DOC) facilities. Recidivism rates were calculated at 6 months, 1 year and 3 years. The data for this research was obtained from the DOC electronic Offender Management Information System (eOMIS). Policy changes in 2013 impacted the rate of returns to the Division of Corrections for parole violators increasing the rate of returns over previous years. However, this report shows that there has been a slight decrease in the rate for those cohorts released in 2016. DOC overall, there was a 1.66% decrease from 2015 to 2016, 2.39% decrease in ADC returns from 2015 to 2016 but a 4.02% uptick in ACC returns from 2015 to 2016.

Methodology:

The 2016 cohort includes individuals who were released from either an Arkansas Division of Corrections (ADC) facility or an Arkansas Community Corrections (ACC) center. This cohort was created by analyzing movement and reason codes found in eOMIS, which identified admission and release dates for each offender. Subsequent recidivism rates are calculated in two steps. First, movement and reason codes after each offender’s release are analyzed, searching for any codes indicating a return to incarceration. The first of these return dates is identified and the return is classified as either a parole violation or a new commitment. The second step is to determine whether each offender returned due to a new felony conviction or for a technical parole violation. Unless otherwise noted, the number of releases reported reflects the number of unduplicated inmate releases.

This report excludes those who:

- Died or were executed have been omitted from the calculation of recidivism rates
- Have been convicted of a new sentence in states other than Arkansas
- Convicted or sentenced in federal court
- Convicted sentenced in another country

Summary of Key Findings

- ◆ 47.49% of those released returned within three years
- ◆ DOC parolees recidivated at a rate of 48.98% whereas discharged offenders recidivated at a rate of 28.78% (Tables 3a-3c, pg. 9)
- ◆ DOC parole violators with new time accounted for 52.27% of the returns compared to technical violators at 38.02% whereas new commitments account for 9.71% (Tables 5a-5c, pg. 11)
- ◆ Male offenders showed a three-year return rate of 49.93% compared with 34.11% for females offenders (Tables 6a-6c, pg. 12)
- ◆ 48.23% of Caucasian offenders and 46.88% of Black offenders returned to incarceration within three years (Tables 7a-7c, pg. 13)
- ◆ As the age of the offender increased, the prevalence of recidivism decreased. Across all age groups for both divisions, offenders between the ages of 17 and 24 found the greatest challenge in adjusting to society. The age groups for both males and females with the greatest number of releases is the 25-34 age group, accounting for about 39% of overall releases. This cohort also had the greatest number of returns (43%) (Tables 8a-8c, pg. 14)
- ◆ The 2016 recidivist spent 13.5 months in the community before returning to incarceration (Tables 9a-10c, Figures 2a-3c, pg. 15)
- ◆ Non-violent offenders (48.29)% returned to re-incarceration at a higher rate than violent offenders (39.23%). The most frequently identified non-violent offenses by law involved manufacture/delivery of controlled substance, residential burglary, theft of property, possession controlled substance schedule I,II meth cocaine <2g and possession drug paraphernalia meth cocaine (Tables, 13, 14 & 15, pg. 25)

Summary of Key Findings^{-continued}

- ◆ 21.87% returned for a sex offense (Table 16, pg. 28)
- ◆ 29.34% returned for a drug offense (Tables 17a-17b, pg. 29)
- ◆ Participation in a Security/Terrorist Threat Group (STTG) can have an effect in increasing recidivism rates (Tables 18a-18f, pg. 30)
- ◆ Counties with recidivism rates of 60% or higher had lower rates of employment also had lower levels of educational attainment and higher poverty rates. Additionally, they were located in rural areas (Tables 19 and Figures 5a-5c., pg. 31)
- ◆ Findings suggest that participation in a program, regardless of type, can have an effect in reducing recidivism rate (Tables 21a-21-b, pg. 38)
- ◆ 9.97% of the inmates who were released in 2016 spent 30 or more days in restrictive housing within three years prior to release and returned to incarceration at a rate of 56.54% (Table 22, pg. 39)
- ◆ SSP releases have a higher recidivism rate than the other cohorts. The inclusion of this other group raised recidivism rates across the board (Table 24a-c, pg. 42)
- ◆ Measures of recidivism rates are not comparable across states because each state has their own unique definition.

SB 260 of the 2013 Regular Session defines recidivism as a criminal act that results in the re-arrest, reconviction or return to incarceration of a person with or without a new sentence during a three-year period following the person's release from custody. This study does not include data regarding re-arrest due to such statistics being unavailable from the Arkansas Crime Information Center (ACIC).

Recidivism Rates Over Time

Table 1a shows the overall recidivism rate. Of the 11,147 offenders who were released in 2016, 47.49% returned within three years.

Table 1a. Recidivism by Overall Rates (DOC)

YEAR	RELEASES	6 MO. RETURN	6 MO. %	1 YR. RETURN	1 YR. %	3 YR. RETURN	3 YR. %
2011	8,427	278	3.30%	784	9.30%	3,093	36.70%
2012	7,343	228	3.10%	923	12.57%	3,204	43.63%
2013	7,487	737	9.84%	1,734	23.16%	3,672	49.05%
2014	9,840	1,263	12.84%	2,690	27.34%	5,031	51.13%
2015	10,629	1,159	10.90%	2,636	24.80%	5,226	49.17%
2016	11,147	1,095	9.82%	2,655	23.82%	5,294	47.49%

Table 1b shows the recidivism rates for inmates who were released from ADC between 2011 and 2016. For each year, the recidivism rates are shown for each post release period. In 2016, ADC released 9,960 inmates. Within 6 months of release, 10.26% were reincarceration. After one year, 24.43% were reincarcerated and after three years, 48.67% were reincarcerated.

Table 1b. Recidivism by Overall Rates (ADC)

YEAR	RELEASES	6 MO. RETURN	6 MO. %	1 YR. RETURN	1 YR. %	3 YR RETURN	3 YR. %
2011	7,144	269	3.77%	735	10.29%	2,846	39.84%
2012	6,238	204	3.27%	825	13.23%	2,886	46.26%
2013	6,490	687	10.59%	1,588	24.47%	3,353	51.66%
2014	8,636	1,153	13.35%	2,461	28.50%	4,589	53.14%
2015	9,465	1,084	11.45%	2,456	25.95%	4,833	51.06%
2016	9,960	1,022	10.26%	2,433	24.43%	4,848	48.67%

Table 1c shows the recidivism rates for offenders who were released from an ACC facility between 2011 and 2016. In 2016, ACC released 1,187 offenders and within 6 months, 6.15% were reincarcerated for a new offense or a technical violation. After one year, 18.70% were reincarcerated, after three years, 37.57% were reincarcerated for a new offense or technical violation.

Table 1c. Recidivism by Overall Rates (ACC)

YEAR	RELEASES	6 MO. RETURN	6 MO. %	1 YR. RETURN	1 YR. %	3 YR. RETURN	3 YR. %
2011	1,283	9	0.70%	49	3.82%	247	19.25%
2012	1,105	24	2.17%	98	8.87%	318	28.78%
2013	997	50	5.02%	146	14.64%	319	32.00%
2014	1,204	110	9.14%	229	19.02%	442	36.71%
2015	1,164	75	6.44%	180	15.46%	393	33.76%
2016	1,187	73	6.15%	222	18.70%	446	37.57%

Facility Release Type

In 2016, Arkansas operated fifteen adult prisons, one supermax prison, five work release centers, two reentry centers and one satellite unit located throughout the state:

- Benton Unit (BN) - Benton. Capacity = 325 males
- Cummins Unit (CU) - Grady. Capacity = 1,850 males
- Delta Regional Unit (DRU) - Dermott. Capacity = 472 males
- East Arkansas Regional Unit (EARU) - Marianna. Capacity = 1,432 males
- Ester Unit (EU) - Pine Bluff. Capacity = 380 males
- Grimes Unit (GRU) - Newport. Capacity = 1,012 males
- J. Aaron Hawkins Center (JAH) - Wrightsville. Capacity = 400 males & females
- Maximum Security Unit (MX) - Tucker. Capacity = 532 males
- McPherson Unit (MCP) - Newport. Capacity = 964 females
- Mississippi County Work Release (MCWR) - Luxora. Capacity = 133 males
- North Central Unit (NCU) - Calico Rock. Capacity = 700 males
- Northwest Arkansas Work Release Center (NWAWR) - Springdale. Capacity = 100 males
- Ouachita River Correctional Unit (ORCU) - Malvern. Capacity = 1,782
- Pine Bluff Unit (PBU) - Pine Bluff. Capacity = 410 males
- Pine Bluff Work Release (PBW) - Pine Bluff. Capacity = 20 males
- Pine Bluff Re-Entry Center (PBRC) - Pine Bluff. Capacity = 54 females
- Randall L. Williams Correctional Unit (RLW) - Pine Bluff. Capacity = 518 males
- Texarkana Work Release Center (TXWC) - Texarkana. Capacity = 128 males
- Tucker Re-Entry Unit (TRE) - Tucker. Capacity = 124 females
- Tucker Unit (TU) - Tucker. Capacity = 910 males
- Varner Unit (VU) - Grady. Capacity = 1,100 males
- Varner Supermax Unit (VSM) - Grady. Capacity = 498 males
- Wrightsville Unit (WR) - Wrightsville. Capacity = 850 males
- Wrightsville Unit Satellite Unit (WRS) - Wrightsville. Capacity = 175 males

In 2016, Arkansas operated six CCC's located throughout the state:

- Central Arkansas CCC (CAC) - Little Rock. Capacity = 150 males
- East Central Arkansas CCC (ECACCC) – West Memphis. Capacity = 350 females
- Northeast Arkansas CCC (NECCC) - Osceola. Capacity = 240 males
- Northwest Arkansas CCC (NWCCC) - Fayetteville. Capacity = 100 females
- Southeast Arkansas CCC (SECCC) - Pine Bluff. Capacity = 350 females
- Southwest Arkansas CCC (SWCCC) - Texarkana. Capacity = 475 males

Releasing Facilities: Table 2 delineates the total releases by facility type and their corresponding recidivism rates:

Release Facility Type	Total Releases	6 MO. Returns	6 MO. %	1 YR. Returns	1 YR. %	3YR. Returns	3 YR. %
Arkansas Division of Community Correction Centers	1,187	73	6.15%	222	18.70%	446	37.57%
Arkansas Division of Correction Facilities	9,596	960	10.00%	2,318	24.16%	4,654	48.50%
County Jail Backup	364	62	17.03%	115	31.59%	194	53.30%

Release Type

Table 3a, 3b and 3c demonstrate recidivism rates by type of release. Offenders are released back into the community through: (1) parole with supervision, which is granted by the Arkansas Parole Board or (2) discharge (completion of sentence). Offenders who are granted parole may have a pre-parole condition that must be completed before release to parole supervision including completing various programs such as substance abuse treatment, therapeutic community or reduction in sexual victimization. Offenders granted parole are not released from prison until a release plan has been approved by the parole office. The release plan includes planned housing and employment upon release from prison.

In 2016, 10,327 offenders were paroled and 820 were discharged from DOC. Of which, 1,067 (10.33%) of the offenders released on parole returned within 6 months and 28 (3.41%) of the offenders discharged returned with a new sentence. After one year, 2,576 (24.94%) offenders released on parole returned whereas 79 (9.63%) of discharged offenders returned with a new sentence. For the three year follow-up period, DOC parolees recidivated at a rate of 48.98%, discharged offenders recidivated at a rate of 28.78%.

Table 3a. Recidivism by Release Type (DOC)

Release Type	Releases	6 Months	6 Months %	1 Year	1 Year %	3 Years	3 Years %
Discharge	820	28	3.41%	79	9.63%	236	28.78%
Released to Supervision	10,327	1,067	10.33%	2,576	24.94%	5,058	48.98%

In 2016, ADC released 9,192 inmates on parole and 768 were discharged. Within six months, 996 (10.84%) of the inmates released on parole returned whereas 26 (3.39%) of the inmates discharged returned with a new sentence. After one year, 2,358 (25.65%) of the inmates released on parole returned whereas 75 (9.77%) discharged inmates returned with a new sentence. For the three year follow-up period, ADC parolees recidivated at a rate of 50.36% whereas discharged inmates recidivated at a rate of 28.52%.

Table 3b. Recidivism by Release Type (ADC)

Release Type	Releases	6 Months	6 Months %	1 Year	1 Year %	3 Years	3 Years %
Discharge	768	26	3.39%	75	9.77%	219	28.52%
Released to Supervision	9,192	996	10.84%	2,358	25.65%	4,629	50.36%

In 2016, 1,135 offenders paroled and 52 offenders discharged from ACC. Within six months of release, 71 (6.26%) of the offenders released on parole returned whereas 2 (3.85%) of the offenders discharged returned with a new sentence. After one year, 218 (19.21%) of the offenders released on parole returned whereas 4 (7.69%) discharged offenders returned with a new sentence. For the three year follow-up period, ACC parolees recidivated at a rate of 37.80% whereas discharged offenders recidivated at a rate of 32.69%.

Table 3c. Recidivism by Release Type (ACC)

Release Type	Releases	6 Months	6 Months %	1 Year	1 Year %	3 Years	3 Year %
Discharge	52	2	3.85%	4	7.69%	17	32.69%
Released to Supervision	1,135	71	6.26%	218	19.21%	429	37.80%

Release & Reincarceration Rate by CCC Facility

Table 4 summarizes the offenders released from Community Correction Centers with corresponding reincarceration rates. Of the 2016 ACC release cohorts, Northwest Arkansas Community Correction Center had the lowest number of releases with 88. The Southwest Arkansas Community Correction Center had the largest number of releases with 452.

Table 4: ACC Facility Releases

Release Location	Releases	6 Months	6 Months %	1 Year	1 Year %	3 Years	3 Years %
Central Arkansas Community Correction CenterAR CCC - Males	100	8	8.00%	26	26.00%	45	45.00%
East Central Arkansas Community Correction Center - Females	129	6	4.65%	13	10.08%	37	28.68%
Northeast Arkansas Community Correction Center - Males	290	24	8.28%	65	22.41%	124	42.76%
Northwest Arkansas Community Correction Center - Females	88	4	4.55%	7	7.95%	18	20.45%
Southeast Arkansas Community Correction Center - Females	128	3	2.34%	14	10.94%	33	25.78%
Southwest Arkansas Community Correction Center - Males	452	28	6.19%	97	21.46%	189	41.81%
Sum:	1,187	73	6.15%	222	18.70	446	37.57%

Figure 1 illustrates that the Northwest Arkansas Community Correction Center female facility had the lowest reincarceration rate 20.45% compared to Central Arkansas Community Correction Center reincarceration rate of 45.00%. Figure 1 shows the total releases by facility and their corresponding recidivism rates.

Figure 1: ACC Reincarceration Rates by Facility

Return Type

Tables 5a, 5b and 5c summarize the return rates by return type. The categories include parole violators with a new sentence (e.g. a parolee who acquires a new conviction while on supervision), a technical violator (violation of parole as a result of a technical condition as opposed to a new criminal conviction) and discharged-reconviction (discharged inmate who has been convicted of a new criminal offense).

In 2016, 11,147 offenders were released from ADC or an ACC facility, of which, 5,294 offenders returned to incarceration. For the DOC, a return to incarceration for a parole violation with a new sentence is the most common form of recidivism, whereas a technical violation while on parole is secondary. Although a new conviction may also have a technical violation attached, oftentimes the new conviction will supersede the technical violation in most cases, making the new conviction the primary reason for returned to incarceration. Overall, parole violators with new time accounted for 52.27% of returns compared to technical violators at 38.02% whereas new commitments accounted for 9.71%.

Table 5a. Return Type (DOC)

RETURN TYPE	6 - Months	1 - Year	3 - Year
New Commitment	29 (2.65%)	99 (3.73%)	514 (9.71%)
Parole Violator New Time	605 (55.25%)	1,479 (55.71%)	2,767 (52.27%)
Technical Violator	461 (42.1%)	1,077 (40.56%)	2,013 (38.02%)
Total	1,095	2,655	5,294

Table 5b. Return Type (ADC)

RETURN TYPE	6 - Months	1 - Year	3 - Year
New Commitment	27 (2.64%)	93 (3.82%)	420 (8.66%)
Parole Violator New Time	567 (55.48%)	1,346 (55.32%)	2,563 (52.87%)
Technical Violator	428 (41.88%)	994 (40.85%)	1,865 (38.47%)
Total	1,022	2,433	4,848

Table 5c. Return Type (ACC)

RETURN TYPE	6 - Months	1 - Year	3 - Year
New Commitment	2 (2.74%)	6 (2.7%)	94 (21.08%)
Parole Violator New Time	38 (52.05%)	133 (59.91%)	204 (45.74%)
Technical Violator	33 (45.21%)	83 (37.39%)	148 (33.18%)
Total	73	222	446

Recidivism Rates by Gender

Tables 6a, 6b and 6c display recidivism rates by gender. Research shows that reentry is a difficult process. For example, offenders must comply with conditions of supervision, find stable employment, locate proper housing, access health care and try to reunite with family. Recently, female incarceration rates have grown at twice the pace of men's incarceration in recent decades. However, female recidivism rates are much lower than male offenders.

Table 6a shows the recidivism rates by gender for DOC. In 2016, 9,429 males and 1,718 females offenders were released. Within six months, 10.66% of the males returned to custody and 5.24% of the females. Within one year, 25.51% of the males returned to custody in comparison with 14.55% of the females. Within three years, 49.93% of the males returned to custody compared with 34.11% of the females.

Table 6a. Recidivism by Gender (DOC)

Gender	Releases	6 - Mo Returns	6 - Month %	1 - Year Returns	1 - Year %	3 - Year Returns	3 - Year %
Female	1,718	90	5.24%	250	14.55%	586	34.11%
Male	9,429	1,005	10.66%	2,405	25.51%	4,708	49.93%
Total	11,147	1,095	9.82%	2,655	23.82%	5,294	47.49%

Table 6b shows the recidivism rates by gender for ADC. In 2016, 8,617 male and 1,343 female inmates were released from prison. Within six months of release, 10.98% of the males were reincarcerated compared with 5.66% of the females. Within one year, 25.76% of the males were reincarcerated compared with 15.86% of the females. Within three years, 50.55% of the males were reincarcerated compared with 36.63% of the females.

Table 6b. Recidivism by Gender (ADC)

Gender	Releases	6 - Mo Returns	6 - Month %	1 - Year Returns	1 - Year %	3 - Year Returns	3 - Year %
Female	1,343	76	5.66%	213	15.86%	492	36.63%
Male	8,617	946	10.98%	2,220	25.76%	4,356	50.55%
Total	9,960	1,022	10.26%	2,433	24.43%	4,848	48.67%

Table 6c shows the recidivism rates by gender for ACC. In 2016, 812 male offenders were released and 375 female offenders were released from custody. Within six months of release, 7.27% of the males were reincarcerated compared with 3.73% of the females. Within one year, 22.78% of the males were reincarcerated compared with 9.87% of the females. Within three years, 43.35% of the males were reincarcerated compared with 25.07% of the females.

Table 6c. Recidivism by Gender (ACC)

Gender	Releases	6 - Mo Returns	6 - Month %	1 - Year Returns	1 - Year %	3 - Year Returns	3 - Year %
Female	375	14	3.73%	37	9.87%	94	25.07%
Male	812	59	7.27%	185	22.78%	352	43.35%
Total	1,187	73	6.15%	222	18.70%	446	37.57%

Recidivism Rates by Race

Tables 7a, 7b and 7c delineate recidivism by race. The 2016 recidivism rates were based on four racial groups: Black, Caucasian, Hispanic and Other. In this report, offenders who reported Asian, Native American and Native Hawaiian or Pacific Islander were collapsed into one group “other”. Overall, for those released in 2016, 48.23% of Caucasian offenders returned to incarceration within 3 years, compared to 46.88% of Black offenders, 38.77% Hispanic offenders and 40.54% of offenders in the “other” category.

Table 7a. Recidivism by Race (DOC)

Race	Releases	6-Mo Returns	6-Month %	1-Year Returns	1-Year %	3-Year Returns	3-Year %
Caucasian	7,081	721	10.18%	1,752	24.74%	3,415	48.23%
Black	3,716	335	9.02%	820	22.07%	1,742	46.88%

Recidivism Rates by Age at Release

Tables 8a, 8b and 8c illustrate recidivism rates by age group: ≤ 17, 18-24, 25-34, 35-44, 45-54, 55-64 and 65 and older. Across all age groups for both divisions, most of the offenders were between the ages of 17 and 24. The age groups for both males and females with the greatest number of releases is the 25-34 age group, accounting for about 39% of the releases. This cohort also had the greatest number of returns (43%). (It is important when interpreting the results presented in the ADC table that the reader take note of the small number of releases in the ≤ 17 age group which can result in non-generalizable recidivism rate. Specifically, there was a 100% recidivism rate for inmates ≤ 17 age group in 2016 but only one inmate was released and that one also returned).

Time to Recidivate

The initial time following parole or discharge presents the greatest challenges for offenders attempting to reenter society. Offenders often rely on their families and friends for housing and support after they are released. Released offenders often have a hard time finding and maintaining employment.

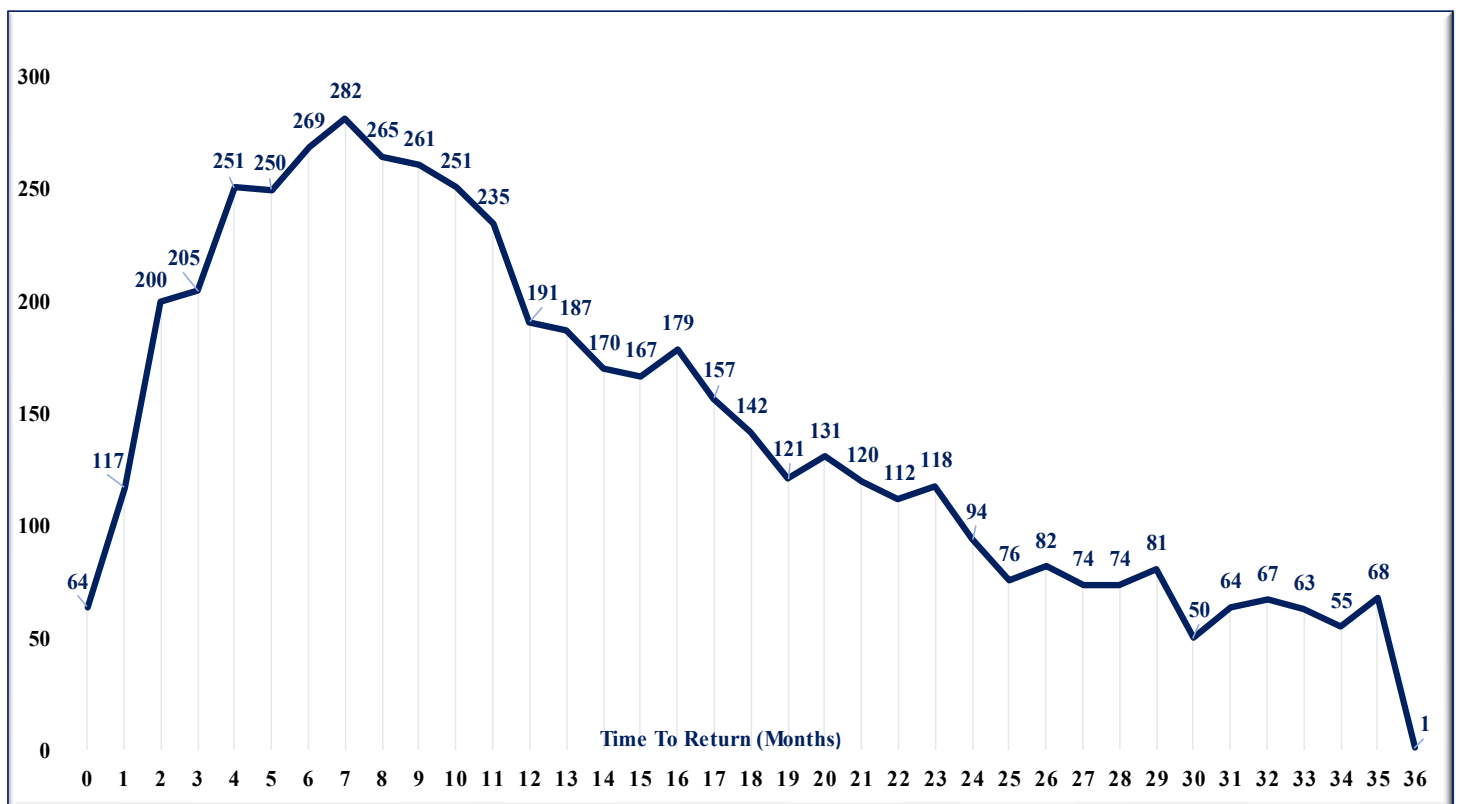

In addition to the traditional binary examination of recidivism, an analysis was also conducted to determine the length of time between the date of release and the date of return. As shown in **Table 9a**, offenders who do not recidivate within 20 months are less likely to recidivate.

Figure 2a shows the number of offenders who returned each month. The 2016 recidivist spent 13.51 months in the community before returning to incarceration, accounting for 57.2% of overall recidivists during the 3 year period.

Table 9a. Time to Return (DOC)

Time to Return	Returns
0 - 6 Months	1,095
7 - 12 Months	1,560
13 - 18 Months	1,050
19 - 24 Months	744
25 - 30 Months	479
31 - 36 Months	366

Figure 2a. Time to Return (DOC)

Time to Recidivate *continued*

As shown in **Table 9b**, a substantial number of recidivist return to incarceration within 12 months of their release.

Figure 2b shows the number of offenders who returned each month. Overall, the ADC 2016 recidivist spent 13.45 months in the community before returning to incarceration, accounting for 57% of overall recidivists during the 3 year period.

Table 9b. Time to Return (ADC)

Time to Return	Returns
0 - 6 Months	1,022

25 - 30 Months	434
31 - 36 Months	322

Figure 2b. Time to Return (ADC)

Time to Recidivate *continued*

Similarly, **Table 9c** shows that the longer an individual stays out, the odds of recidivism decrease.

Figure 2c shows the number of offenders who returned each month. Overall, the ACC 2016 recidivist spent 14.19 months in the community before returning to incarceration, accounting for 53.6% of overall recidivists during the 3 year period

Figure 2c. Time to Return (ACC)

Time to Recidivate *continued*

The transition from incarceration to life on the outside can be difficult. Research has shown that older offenders are less likely to recidivate compared to younger offenders. **Figures 3a, 3b and 3c** and **Tables 10a, 10b and 10c** illustrate the average months spent outside of prison before reincarceration by age category. As the age of the offender increased, the prevalence of recidivism decreased.

Figure 4. Recidivism Rates by Education Level

Recidivism Rates by Offense of Incarceration

For DOC **Table 12a** displays the recidivism rates of active offenses at the time of release in ascending order. This data represents specific offenses, not unique offenders, who may have been incarcerated for multiple offenses. For example, an offender who was incarcerated on both burglary (i.e., 1301-burglary) and kidnapping (i.e., 0201-kidnapping), would be counted once for both offenses. An offender who was incarcerated on two counts of sexual assault, on the other hand, would be counted once for 0513 - sexual assault. To compare recidivism rates, offenses represented by fewer than 20 releases were omitted from **Tables 12a, b and c**.

Violent vs. Non-Violent Offenders

Of the 11,147 offenders that were released from the DOC, 984 were convicted of a violent offense and 10,163 were convicted of a non-violent offense. Of the 984, 386 (39.23%) returned within three years. Of those who had committed a non-violent offense 4,908 (48.29%) returned within three years. This report shows that non-violent offenders returned to reincarceration at a higher rate than violent offenders.

The most frequently identified violent crimes (DOC) include:

Violent vs. Non-Violent Offenders *continued*

In 2016, ADC released 9,960 inmates, of which 984 had committed a violent offense and 8,976 had committed only non-violent offenses. Of those who had committed a violent offense, 386 (39.23%) returned within three years. Of those who had committed a non-violent offense 4,462 (49.71%) returned within three years. This report reflects that non-violent offenders returned to re-incarceration at a higher rate than violent offenders.

The most frequently identified violent crimes (ADC) include:

Violent vs. Non-Violent Offenders *continued*

Only offenders with targeted non-violent or non-sex offenses may be ordered to a Community Correction Center as per §16-93-1202. Therefore, this page will differ slightly from pages 19 and 20 since Arkansas Community Correction only house offenders with targeted non-violent or non-sex offenses.

Recidivism Rates by Sex Offenses

This report examined recidivism rates for offenders who were released with an active sex offense (e.g., sexual assault, distribution/possession/viewing sexual explicit material or rape) and recidivated for a sex offense. Note that in this report, failure to register was not counted as a sex offense when counting returns to incarceration.

For offenders who recidivated:

- Average age at offense - 22
- Average age at release - 28
- Average age at return - 29
- All were males, no female sex offenders recidivated for a sex offense
- All sex offender recidivists were Caucasian
- 62.5% were released on parole
- 37.5% discharged their sentence
- Average months incarcerated was 67 months
- Average months out was 14 months
- Four of the recidivists had completed the Reduction of Sexual Victimization Program (RSVP) prior to release and four did not complete RSVP prior to release.

Overall, 1.87% returned for a sex offense within three years.

Note: No offenders were released from an ACC facility as they do not accept offenders guilty of sex offenses.

Table 16.

Recidivism Rates by Drug Offenses

This report also examined recidivism rates for offenders who were released for a drug offense and recidivated for a drug offense. Please note that this data reflect unique drug offenses and not unique offenders when referring to a specific offense (e.g., an offender released for possession drug paraphernalia meth cocaine could have also been released for manufacture/deliver/possession of control substance and are counted in each offense).

Within three years of release after serving a sentence for a drug offense, 29.34% or 1,569 returned for a drug offense.

- Top five released offenses include: manufacture/delivery/possession controlled substance, possession controlled substance schedule I, II meth cocaine < 2g, possession drug paraphernalia meth cocaine, advertise drug paraphernalia and possession drug paraphernalia manufacture meth cocaine
- 29.97% of the males compared with 26.47% of the females released with a drug offense also returned with a drug offense within 3 years
- 72.66% were Caucasian, 24.15% were Black, 2.23% were Hispanic and 0.96% were Other
- Average age - 32
- Average age at release - 36
- Average age at return - 37
- Average months incarcerated was 11.83 months
- Average months out was 14.21 months

Recidivism Rate by STTG Status

Security/Terrorist Threat Groups (STTG) are a growing concern for penal institutions. Research indicates that STTG membership is linked to recidivism. Participation in a STTG can increase the size of an individual's social network which can increase their opportunities to reoffend once they are released. One study found that paroled prison gang members and associates continue to conduct criminal activities on behalf of the gang after release. Additionally, gang members are less committed to legal employment, are more likely to have a criminal history and use drugs when compared to non-gang members. Tables 18a through 18f shows that those with a confirmed STTG status recidivated at a higher rate than those without as shown below.

Table 18a. Recidivism Rate by STTG - DOC

Table 18f.

Recidivism by County of Conviction

Table 19 shows the recidivism rates by the county of conviction over a 3 year period. Please note that some offenders may have had active sentences in multiple counties.

Figures 5a, 5b and 5c, illustrates a 3 year recidivism pattern across Arkansas counties for offenders released in 2016. Interestingly, the counties with a recidivism rate of 60% or higher also had lower rates of employment, lower levels of educational attainment and higher poverty rates. Additionally, they were located in rural areas.

Figure 5c:

Recidivism by Program/Class

Tables 20a, 20b and 20c exhibit recidivism rate by DOC program and class completion. This data reflects unique program and class completions, not unique offenders (e.g., an offender who completed substance abuse treatment program, anger management, and thinking errors group are counted 3 times). Furthermore, only completions that occurred within the three years prior to release were counted. Programs and classes are displayed in descending order by recidivism rates. Only programs/classes with 20 or more releases are shown.

The Effects of Program Participation by Recidivism

In Arkansas, at least 92% of incarcerated offenders will be release from incarceration at some point in their sentence. To increase the potential for successful reintegration into the society, the DOC offers offenders a wide range of programs, classes and services including substance abuse, therapeutic community, reduction of sexual victimization, religious, anger management, parenting skills, communication skills, job readiness, thinking errors, academic and vocational education. Evidence shows that without some form of intervention, punishment alone is ineffective at reducing recidivism.

Table 21a shows that 44.44% of program participants recidivated within three years.

Table 21b shows that 51.98% of offenders who not did participate in some correctional programming recidivated within three years.

Programming — 3 Years Prior to Release

Table 21a.

Agency	Releases	6 - Month Returns	6 Month %	1 - Year Returns	1 - Year %	3 - Year Returns	3 - Year %

The Effects of Restrictive Housing on Recidivism

Restrictive Housing (RH) commonly known as administrative segregation has been used throughout the United States. RH is when inmates are placed in isolation and their activities are strictly limited and closely monitored. The Institutional Classification Committee or, in an emergency, the Warden/Center Supervisor or designee may place an inmate in RH if his/her continued presence in the general population poses a direct threat to the safety of persons or a clear threat to the safe and secure operations of the facility. Generally, inmates in RH may spend 22 hours or more a day in their cell. Depending on their housing unit, some inmates in RH may be permitted to leave their cell to shower, participate in a program or for recreation. This report represents the inmates who spent more than 30 days in restrictive housing compared to those inmates who spent 30 days or fewer in restrictive housing prior to being released in 2016 as noted in the tables below.

- 92% were males compared with 8% females
- 52.9% were Caucasian, 44.9% were Black, 1.9% were Hispanic and 0.3% were Other
- Average age - 32

Data reflects that inmates who spent more than 30 days in RH may signal a behavioral problem that can lead to an increased risk of recidivism for some inmates.

Table 22a shows that 9.97% of the inmates who were released in 2016 spent 30 or more days in restrictive housing within three years prior to release and returned to incarceration at a rate of 56.54%.

Restrictive Housing > 30 Days

Recidivism Rate by Military History

Across various studies, veterans with mental illness, combat exposure, alcohol and drug problems and Post Traumatic Stress Disorder (PTSD), they often experience difficulty adjusting to civilian life and economic disadvantages and have an increased risk of contact with the criminal justice system.

The DOC houses 1,191 active offenders who claim veteran status, which is 6.7% of the overall population. The Department of Corrections recognizes the need for programming for the current and increasing population of veterans' incarcerated. For example, the Barbara "Ester" Unit has established a Veteran's Outreach Program. Also because of the needs of this population, the U.S. Department of Veterans Affairs Health Care for Reentry Veterans (HCRV) program is designed to promote success and prevent homelessness among veterans returning to the community after incarceration. The DOC has partnered with the Veterans Affairs and currently has an HCRV program specialist who provides services to veterans who are nearing release.

Tables 23a, b and c show the recidivism rate as a function of military background characteristics.

Supervision Sanction Program

To reduce the number of offenders waiting in county jails for bed space at the Division of Correction, the Arkansas legislature created a short-term incarceration sanction program as part of Act 423 of 2017 to reduce revocations and alleviate overcrowding in Arkansas' prisons. The Supervision Sanction Program (SSP) operates as an alternative sanction for male and female probation and parole technical violators. The SSP is an intensive residential program followed by aftercare services while under community supervision. A resident completes the program by progressing through a phase system. A resident's length of time in treatment is based upon their program track (90 or 180 days) and progress with participation during treatment. A resident may be eligible for early release if criteria is met while in the program. Early release may be granted for up to fifty percent of their total time ordered to be served if participation and progress in treatment meet the eligibility criteria. However, more time and data is needed to understand this population but for the purposes of this report, a section has been devoted to show the breakdown of the 2016 SSP release cohorts recidivism rates:

- ◆ Base Recidivism – No SSP: The original recidivism rates featured in the rest of the report
- ◆ Base Recidivism + SSP Releases: Recidivism Rates including SSP releases
- ◆ SSP Releases: Number of people with SSP as their last release, along with their respective recidivism rates For ACC, Supervision Sanction Center releases are also shown, along with their respective recidivism rates
- ◆ First Return to SSP: Number of individuals whose first return was to SSP rather than prison. ADC in particular is interesting, due to how many people ended up coming back on SSP originally. Based on the numbers, it is likely that many of those people only came back on SSP

The key takeaway is that SSP releases have a higher recidivism rate than the other cohorts. The inclusion of this other group raised recidivism rates across the board.

Table 24a.

Base Recidivism - No SSP						
Releases	6 - Months	6 - Month %	1 - Year	1 - Year %	3 - Year	3 - Year %

Conclusion

The purpose of this report was show the recidivism rates for offenders released from the Arkansas Department of Corrections (DOC) in 2016. Each year, hundreds of thousands of convicted felons are released from correctional facilities across the United States. In Arkansas, nearly 92% of offenders will return to society. In 2016, 11,147 offenders were released from the DOC. Within three years, nearly half (n= 5,294, 47.49%) were reincarcerated. On average, offenders that returned spent 13.5 months in the community.

Upon release, previously incarcerated individuals face a number of barriers that can deter desistance. The Arkansas Department of Corrections provides various classes, offer treatment programs and services, work opportunities aimed to reduce these barriers. The DOC also hosts job fairs and organizes aftercare appointments for those with mental illness during incarceration. Successful rehabilitation and reintegration is a process that depends on the collaboration of all stakeholders, including justice involved individuals, employers, community members and many others. This is important because criminality can negatively impact the perpetrator, families, victim and society.

Supplemental Information

Arkansas defines recidivism as a criminal act that results in the rearrest, reconviction or return to incarceration of a person with or without a new sentence during a three-year period following the person's release from custody.

Through the graphic map displayed in **Supplemental Figure 1** on the following page, it is important to note that because of the diversity, measures of recidivism rates are not comparable across states because each state has their own unique definition. These differences can create difficulties in interpretation because recidivism can be measured in a variety of ways, with the various measures setting different criteria for labeling a person as a recidivist.

To create this map, we gathered information from 47 states pertaining to their recidivism rate and their conceptualization of recidivism. In October 2020 we relied on state DOC websites and email surveys to collect this data. Three states have no statistics available.

Below are the highlights from what we found:

- ◆ The definition of recidivism varies by state. For example, a state department calculated the rate of recidivism based upon an offender who is sentenced to more than one year of incarceration who, after release from incarceration, return to prison within three years for a conviction for a new offense or a violation of supervision resulting and the new incarceration sentence or time served on the violation is at least 90 days. Another state, defined recidivism as criminal acts after a correctional release and/or expand measures to include arrests, convictions, and incarcerations
- ◆ Definitions may include a new sentence, parole or probation revocation. Conversely, other states may only count new sentences
- ◆ Some states only measured returns to state prisons and do not include county and local jails
- ◆ Some states also based their rates on fiscal years while other states base their rates on calendar years
- ◆ Although many states reported three year recidivism rates, we identified some states that report two year recidivism rates
- ◆ Other states break down recidivism rates by a variety of factors for example, gender, 6 month cohorts, probation and parole, recommitment and return to prison, reconviction with new felony and reconviction and reincarceration and desistence or “inmate success rate
- ◆ Some states include additional criteria for recidivism, such as requiring three 45-day confinements prior to a full revocation or requiring a return of at least 90 days

As noted above, a state's recidivism rate is the product of numerous factors. To understand a state's recidivism rate, an examination of their specific definition is necessary. Additionally, state policies and procedures also impact recidivism and recidivism rates..

Recidivism Rates Across the United States
